Overview

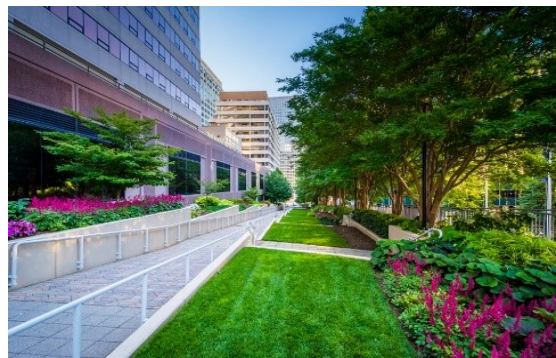

Green House for Gardens Design provides wide range of services related to Hard and Soft Landscape and its Maintenance Works, Irrigation Networks as well as indoor plants maintenance all over Qatar since 2012.

Our dedicated and experienced engineers provide professional and inspirational landscape designs and maintenance services to suit clients' conventional requirements and needs. We provide unique variety of plants for projects, bringing in exotic and premium collection of plants including ceramic, plastic and fiber pots, for indoor and outdoor usage.

Our Engineers cater a garden program for small and large gardens and include services like shaping, grass treatment, vitamin boosting and training owners to maintain their gardens. All this fall under a schedule designed by the landscape engineers and monitored by the project managers to cover all the services and requirements for your garden, such as foliar fertilization, organic fertilization, and chemical fertilization, lawn scarifying, aerating and mowing. Our team also prepares the clients gardens for the heat season, taking prevention methods to protect the green during the hottest months (plant cover, vitamin booster).

Our prices are very competitive within our client's budget always, however we will offer further discounted prices for Governor Hotel to maintain long term business partnership.

Services

With various years of experience in the industry, our landscaping services are here for you when you need quality work done right. We can design and install new landscaping or add to your existing landscape. Let us improve your property with outdoor lighting, water gardens, retaining walls, paver patios, walkways and more. We offer financing options to go along with our already affordable pricing, to make it as easy as possible for you to make your dreams come true for your property.
